Max profile height : Top profile 112mm

Maximum panel weight : 150kg

Maximum no. of panels : Numerous stacking options with unlimited number of panels for complete flexibility

Available finish : Silver anodized/Black anodized or any customized RAL, wooden finishes

GLAZOFOLD

GLAZOFOLD GLASS SLIDING & FOLDING SYSTEM

In recent years, the issue of dividing a room has been the main discussion point by many people. With many strict tests, Glazofold Glass Sliding & Folding System - Patch Fitting Type gives a sheer quality and a solution for people who are looking for a clear and transparent vision with a minimum parking space.

It is applicable to many locations such as Convention Centers, Retail and Mall shop fronts, Restaurants, Commercial and Domestic rooms division use. We especially focus on "the comfort" when operating the system.

With this system you don't need to install a bottom track or guide, as it requires minimal effort to fold/retract the glass panels via the top track only.

The concealed bearing design of the hinge does not allow any dirt or foreign objects in, allowing for a smooth and effortless operating system.

SLIDOFOLD 45

SLIDOFOLD 45 FRAMELESS FOLDING GLASS WINDOW

Slidofold 45 is a balcony glazing system, which can be used in various balcony configurations and orientation as per the requirements. The robust build of Slidofold 45 makes the system almost maintenance free as the track is 3mm thick and can take load of up to 50 KG per panel so that rollers function smoothly irrespective of the load.

State of the art mechanism makes sure it is easy for anyone to use. The panels can be turned to 90 degree for corner parking if needed.

Glass Options:

Slidofold 45 can be used with 8mm tempered glass as well as laminated glass.

Size:

The maximum width of the glass panel can be 600 mm and the maximum height can be 2200mm.

Safety:

Nylon protection caps on glass profiles have been provided to avoid injury to the user while using the system. The nylon protection caps with male and female connection ensures better sealing between the panels.

SLIDOFOLD 50

SLIDOFOLD 50 FRAMELESS FOLDING GLASS DOOR

Slidofold 50 is a stable, strong frameless folding system with the latest structure design as a balcony glazing system.

Slidofold 50 comes with a zero impact appearance on overall architecture of the space. Each panel can be packed individually to the left or right or, for larger glazed units, it can even be divided on both sides. It comes with a compensation profile to adjust the gap between top tracks and the ceiling.

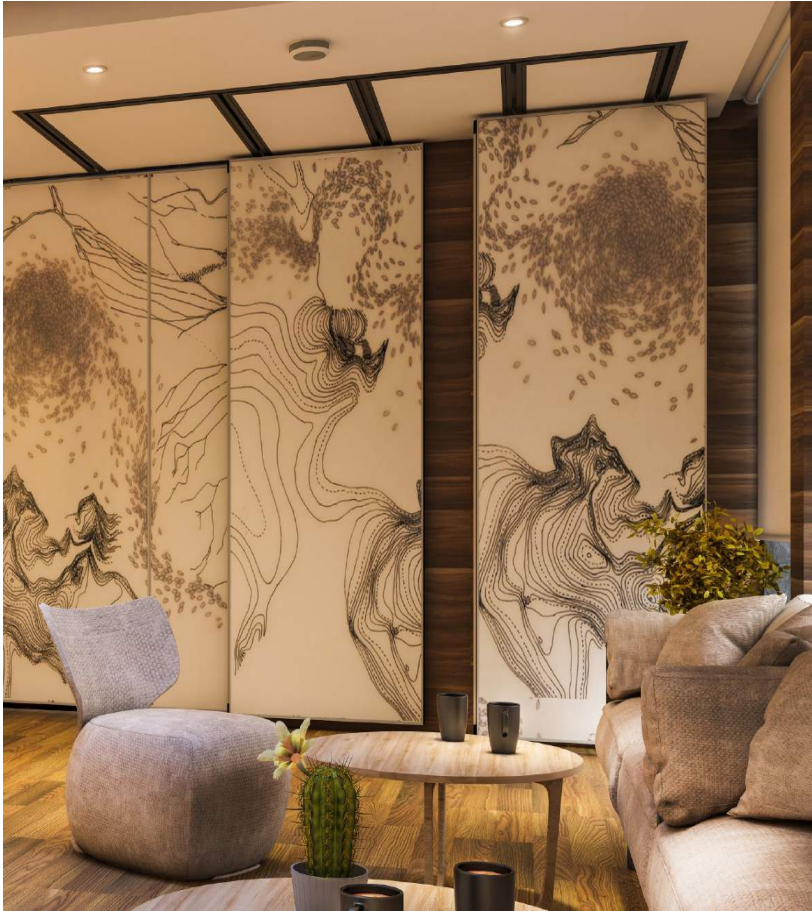

The bottom track comes with an option of embedded track-flush type and normal bottom track above the floor level.

Glass Options:

Slidofold 50 comes with two glass options - 10mm and 12mm

Size:

The maximum width of the glass panel can be 850mm and the maximum height can be 2800mm.

ZILIO LITE

ZM - W100/85/65 LITE

The Acoustic 100/85/65 LITE is a range of high performance & aesthetically pleasing acoustic movable walls, used to create maximum flexible space division in offices, meeting rooms, schools, colleges, hotel conferences & function suites. It consists of individually operated top hung panels requiring no floor tracks. It can provide sound insulation of 35 dB to 50 dB and the height of the walls can be up to 12 meters. Single or double pass doors can be integrated.

Features

Type : Acoustic 100/85/65
Panel Thickness : 100/65/85mm
Panel Height : 1800mm - 12000mm
Panel Width : 600mm - 2000mm
Frame Construction : Aluminium/MS Steel
Surface Board : 9mm/12mm/16mm
Vertical Profiles : Anodized aluminium
w/magnetic strips
Horizontal Profiles : Silver aluminum/EPDM
Doors : Single or Double
Acoustic Rating : 35 dB - 50dB

ZILIO PRO

ZM - W85/100 PRO

The Acoustic 85/100 movable wall system can create silence with a panel thickness of only 107mm. It is extremely easy to operate and completely user-friendly. There are no limits on parking layouts and countless design surfaces to choose from. As with the name, Acoustic 85/100 can provide sound insulation of 46 dB to 55 dB. The height of walls can be up to 15 meters. The standard panel width is 1200mm, but the wide panels of more than 2000mm are often produced on special request without any problem.

Features

Type : Acoustic 85/100
Panel Thickness : 85mm/107mm
Panel Height : 1800mm - 15000mm
Panel Width : 600mm - 2000mm
Frame Construction : Aluminium/MS Steel
Surface Board : 12mm/16mm MDF
Vertical Profiles : Anodized aluminium
w/magnetic strips
Horizontal Profiles : Silver aluminum/EPDM
Doors : Single or Double
Acoustic Rating : 46 dB - 55dB

ZILIO PRO

ZM - G85/100 PRO

The Acoustic 85/100 Glass movable wall system can create silence with a panel thickness of only 85mm. It is extremely easy to operate and completely user-friendly. There are no limits on parking layouts and countless design surfaces to choose from. As with the name, Acoustic 85/100 can provide sound insulation of 35 dB to 44 dB. The height of walls can be up to 6 meters. The standard panel width is 1200mm, but the wide panels of more than 2000mm are often produced on special request without any problem.

Features

Type : Acoustic 85/100
Panel Thickness : 85mm/107mm
Panel Height : 1800mm - 4500mm
Panel Width : 600mm - 1200mm
Frame Construction : Aluminium/MS Steel/Ply
Surface Board : 10mm glass
Vertical Profiles : Anodized aluminium in tongue and groove design
Horizontal Profiles : Silver/Black aluminum/EPDM
Doors : Not available
Acoustic Rating : 35 dB - 44dB

NIUFOLD

CUSTOM POWERLIFT ACOUSTIC VERTICAL WALL PARTITIONING SYSTEM

This system is radically different from traditional operable wall systems. NIUFOLD is fully automated. A simple turnkey operation retracts the partition quietly and effortlessly into the ceiling. Its automated design eliminates the need for manual labor to operate the walls and ensures that the acoustic rating of the wall is maintained as originally intended.

NIUFOLD has exceptional acoustical performance with a sound insulation rating of 58dB to 62dB, while remaining lightweight. At approximately 40 Kilograms per square meter compared to traditional operable wall partitions with the same sound insulation rating weighing 55 kilograms per square meter, NIUFOLD contributes to substantial savings in structural steel cost.

Custom Dimensions
Height - Up to 12000mm
Width - Unlimited

PRO/LITE SEMI SMART

The Pro/Lite Semi Smart movable wall system is best suited solution for offices and places where number of panels are more and requires sophisticated and easy push button action to retract and open the retractable at the push of the button.

Features

Type : Acoustic 85/100
Panel Thickness : 85mm/107mm
Panel Height : 1800mm - 15000mm
Panel Width : 600mm - 1000mm
Frame Construction : Aluminium/MS Steel
Surface Board : 12mm/16mm MDF
Vertical Profiles : Anodized aluminium
w/magnetic strips
Horizontal Profiles : Silver aluminum/EPDM
Doors : Single or Double
Acoustic Rating : 46 dB - 55dB

PRO/LITE AUTO SMART

The Pro/Lite Auto Smart series of zilio moves and parks itself on its own with just a touch of a button for ease and it comes with collision detection for the safety. It comes in different parking configurations and options for clients to choose from.

Features

Type : Acoustic 85/100
Panel Thickness : 85mm/107mm
Panel Height : 1800mm - 15000mm
Panel Width : 600mm - 1000mm
Frame Construction : Aluminium/MS Steel
Surface Board : 12mm/16mm MDF
Vertical Profiles : Anodized aluminium
w/magnetic strips
Horizontal Profiles : Silver aluminum/EPDM
Doors : Single or Double
Acoustic Rating : 46 dB - 55dB
